ABSTRACT

The secondary English activities materials developed by the North Dakota Exemplary Project represent information that will be helpful to teachers in achieving the goals of a career education program. The guide provides a flexible framework to provide experiences that will support the learning principles needed to attain the required knowledge, attitudes, and skills essential to productive living integrated into the existing curriculum. A brief explanation is offered by career education--its definition, philosophy for the secondary level, specific secondary objectives, summary of career education objectives, and the need for career education. The needs of the students, involvement in the world of work, and classroom facilities should set the stage for the selection of resource units to be used. Within the English area, activities are organized by the career education elements of: self awareness, career awareness, attitudes and appreciations, employability skills, and education awareness. Each broad objective includes specific behavioral objectives, a suggested subject area and grade level, learning activities, suggested teaching techniques, resource materials, and worksheets. Supplemental materials are appended.

## PREFACE

The 1968 Vocational Education Amendments called attention to the need for innovative programs in education that would help students bridge the gap between school and work. In response to this legislation the State Board for Vocational Education in cooperation with the Department of Public Instruction, the Bismarck Public School District, and others have initiated a developmental program in Career Education. This program has been developed and field tested in the Bismarck District and other schools that have asked to become involved during 1970 - 1973.

The following materials have been compiled by the staff of North Dakota's Exemplary Career Education Program with the assistance of many individuals and groups. The contents are designed as ideas that could be used to develop various Career Education concepts and objectives. The activities are to be integrated into your existing curriculum, sequenced, and adapted to meet the needs of all people involved in education at the local school.

#### ACKNOWLEDGMENTS

The staff of the State Exemplary Project in Career Education gratefully acknowledge the help of the teachers, administrators and counselors in the Bismarck Public Schools for assistance in the development and field-testing of the suggested activities.

In addition to the personnel in the Bismarck School District many individuals and groups contributed to furthering the effort of Career Education in North Dakota. The project staff extends a special thank you to the staff of the State Board for Vocational Education, members of the Department of Public Instruction, and all other school districts, agencies, and individuals that helped make this publication a reality.

## PURPOSE OF THIS GUIDELINE

The Career Education reference material included in this guideline represents information that will be helpful to teachers in achieving the goals of a Career Education program.

The guide provides a flexible framework to provide experiences that will support the learning principles needed to attain the required knowledge, attitudes and skills essential to productive living. Within this flexibility, there is no planned sequence of study in this guide. The needs of the students, the involvement in the world of work and the classroom facilities should set the stage for the selection of resource units to be utilized.

This guide does not provide a framework for a separate unit on careers. Rather, it is expected that learning experiences from the guide will be incorporated into existing units of instruction.

This guide is organized around 16 major objectives. To achieve these objectives the activities include expected student behavior and suggested learning experiences. Teachers are encouraged to add other goals and learning experiences which they have found successful.

The Career Education activities in this guide have been organized in the Table of Contents as they relate to the elements of the Career Education Program. With this structure, the teacher has a ready reference for the selection of an activity appropriate for working with that element. In using the activities, the classroom teacher should make special note of the format as it applies to the student and teacher needs. Provisions have been made for a broad objective and supportive techniques. Also, suggested resources have been listed to help the teacher and student work out a plan of study. It is not intended that the teacher be limited to the activity as presented. Rather, it is to be thought of as a point of departure in accomplishing the desired objectives.

### DEFINITION OF CAREER EDUCATION

"Career Education represents the total effort of public education and the community to help all individuals become familiar with the value of a work oriented society, to integrate those values into their personal value structure, and to implement those values in their lives in ways that make work possible, meaningful, and satisfying to each individual."

Dr. Kenneth Hoyt

Career Education is an integral part of education. It is a concept that includes as its main thrust the preparation of all students for a successful life of work by increasing their options for occupational choice and attainment of job skills, and by enhancing learning achievement in all subject matter areas. Career Education is a series of growth experiences which begins in the home and continues at the pre-school and elementary, junior high and senior high, post-secondary and adult levels of education. Emphasis is placed on career awareness, orientation and exploration of the world of work, decision-making relative to additional education, preparation for employment, and understanding the interrelationship between a career and one's life style. It provides purposefully planned and meaningfully taught experiences which contribute to self-development as it relates to various career patterns. Career Education calls for a total effort of the home, school and community to help all individuals become familiar with the values of a work oriented society, to integrate these values in their lives in a way that work becomes useful, meaningful and satisfying.

## CAREER EDUCATIONAL PHILOSOPHY

### Secondary

Career Education is that one aspect of lifelong individual development which relates to the need for continuous growth of the individual and which occurs with social, emotional, intellectual and general personal development. All facets of individual development are integrated with each other in a life-long continuing process.

Career Education in the secondary school provides for broad based occupational exploration including classroom, shop, laboratory and field experiences in a variety of occupational areas.

It is designed to assist secondary students, through an interdisciplinary approach, develop a more realistic plan for their own careers. The activities provide for further development of self-concept, self-appraisal of abilities, interests and aptitudes; understanding of education avenues; appreciation of economic and social values of work and an awareness of the decision-making process.

The decision-making process is an important facet of career development at the secondary level. The student relies heavily on pre-high school experiences relating to awareness and exploration experiences of the individual in the career education activities on the elementary level.

The decision-making process is not a "one shot" deal but rather an end result of many experiences throughout the lifetime of an individual. Whether or not the decision will be a realistic one for the individual depends on how he sees himself in relation to the total picture. Therefore, career education necessarily becomes a lifetime process since decisions are constantly being made by the individual.

Educational curriculums and other experience usually consider the physical, emotional, intellectual, and general educational development but, unless coincidental, fail to consider the other aspect of career education in the overall educational process. In light of this void in the curriculum, activities or experiences must be provided each student by the classroom teacher. No one individual or department in the school system can achieve the desired goals alone.

Many of the activities provide an opportunity for the students to visit the business community and observe workers on the job at all levels, including semi-skilled, skilled, technical, and professional occupations. Students will interview workers to learn their respective feelings about their occupation, the educational requirements, work settings, benefits, work hours, and job characteristics relative to self-characteristics.

The secondary student must be cognizant of the options before him and through classroom or subject matter related experience be reminded of the resources, both intellectual and materialistic, from which he can draw in making a realistic decision; he must be equipped to deal with the decision as it affects his future; be prepared to make necessary adjustments demanded by his environment; in general begin planning and preparing for adult living.

## SPECIFIC SECONDARY OBJECTIVES

1. To create self-awareness of students' interests, abilities and aptitudes.
2. To help students set realistic goals in light of knowledge about themselves.
3. To relate that technology affects the number and types of careers and to illustrate the interdependency of workers.
4. To acquaint students with the various aspects of community job resources, job hunting, applying, interviewing and securing employment.
5. To show a relationship between school subjects and opportunities that exist throughout life.
6. To familiarize students with sources and uses of occupational materials in the library and/or counselor's office.
7. To become aware of employment trends and outlooks, employer-employee relationships and the distribution and mobility of employed persons.
8. To investigate projected needs for various workers and the career patterns involved with these workers.
9. To acquaint students with the basic economics, budgeting, and the importance of fringe benefits when considering employment.
10. To acquaint students with labor unions, apprenticeship programs, and journeyman programs.
11. To expose students to a full range of occupational opportunities.
12. To understand goals, values, and aspirations and how they relate to the choice of a career.
13. To develop basic problem-solving techniques.
14. To acquaint students with the need for continuing education.
15. To help students make a realistic choice of post-secondary plans.
16. To help students make the necessary adjustments for adult living.

## NEED FOR CAREER EDUCATION

A fundamental purpose of education is to prepare people to live a productive and rewarding life. For far too many Americans our schools are failing in this essential mission.

In typical schools throughout the country young people complain that curriculums are dull and irrelevant, that their education is not opening pathways to a fulfilling adulthood. Substantial numbers of students score below their grade level in basic skills; high dropout rates, absenteeism, academic failure, drug abuse, vandalism, and assaults on administrators, teachers, and pupils signal their discontent.

It is a rare school that equips all its students to make the choice upon graduation of entering the job market with a salable skill or of continuing their education. Too often the graduate has neither option, let alone the opportunity to select one or the other.

Nearly 2.5 million students leave the formal education system of the United States each year without adequate preparation for a career. In 1970, not counting enrollment in homemaking, only about one high school student in six was enrolled in occupational preparation. More persons are graduating from a 4-year college with a bachelor's degree than there are jobs for degree holders. By the end of this decade eight out of ten jobs in America will not require a baccalaureate degree.

In a modern society, formal education stands directly between a person and his ability to support himself and his family. If the quality or the appropriateness of any child's formal education is poor, what might have been a roadway to opportunity will remain a barrier. To fail to fulfill a responsibility in this respect means to render a large proportion of the future citizens of this country economically obsolete.

More appropriate curriculums must be developed, validated, and installed and they must be used more realistically if we are to meet the needs and desires of students and serve the purposes of society.

**BROAD OBJECTIVE:** To make students aware of behavior and to explore the causes of behavior.

**SPECIFIC BEHAVIORAL OBJECTIVE:** The students will write a story telling about behavior be observed and include possible causes of such behavior.

ACTIVITY	SUGGESTED TECHNIQUE	RESOURCE MATERIALS
Pre-test  Write a story about behavior you have noticed. Include your ideas about the possible causes of such behavior.	Consider the following when evaluating your observations:  1. Feelings of the people at the time. 2. Feelings that preceded the situation. 3. Feelings afterwards. 4. How feelings influence actions.	All About You SRA 1955  Into Your Teens. Are some ways of expressing emotions more socially acceptable than others?  4. What is maturity? 5. What are some signs of maturity? <u>Post-test:</u> 1. Define emotions 2. How do different people express their emotions? 3. What are some of the more socially acceptable ways of expressing emotions. 4. List the seven signs of maturity.	

**SUGGESTED CORRELATION FOR THIS ACTIVITY:**

## Emotions

Emotions play a part in everything people do. We all feel joy, fear, anger, or elation at various times.

We react to our emotions in different ways. Internal reactions are difficult to control: heart beats faster, blood pressure rises, perspiration occurs, breathing becomes fast and shallow.

Part of growing up is learning appropriate ways of showing our emotions.

The ways people express their emotions vary in different societies.

Traditional ways of expressing emotions change from time to time within a society.

There are many cases in which it is better to express emotions in socially acceptable ways rather than to suppress them.

Psychologists have indicated that people who are emotionally upset are unable to think straight or work efficiently.

Your emotions become more complex and more refined as you find new and better ways of getting along with people.

## Seven Signs of Maturity

You are able to deal constructively with reality.

You are able to adapt to change.

You can handle fears, tension and anxiety.

You get more satisfaction from giving than receiving.

You are able to build satisfying relationships with other people.

You are able to control your hostile feelings and acts.

You are able to love.

No person, no matter how mature, is able to score 100% on all of these characteristics.

The important thing is to strengthen weak spots, learn from experience, and keep sight of your goals for self-fulfillment as a person. This provides satisfaction with life and the basis for real happiness.

CAREER DEVELOPMENT ACTIVITIES

You may be wondering why you are being asked to look at yourself when you may feel that you, above all people, know the most about the person you are. We all feel that we know ourselves pretty well and that most of the time we could give the reasons for what we do and say.

Actually, however, human beings are not always easy to understand. Stop and think for a moment. Aren't there many times when you have acted a certain way or had certain feelings and you couldn't quite be sure why? You may recall times when things were going very well, yet you just became "moody", and for no apparent reason. Also, as with all of us, you have met some people you liked very much right away, others who didn't impress you at all, and in neither case could you really say why.

Most of us have moods once in a while and experience likes and dislikes for different people, activities and situations. These individual reactions are all considered "normal"; they make up your personality, which is every-think that makes you an individual, differing in certain ways from everyone else (your habits and attitudes that cause you to act the way you do). And of course, your personality is not fixed for all times; it develops through the years. Every new problem you solve, or experience you have helps form your personality.

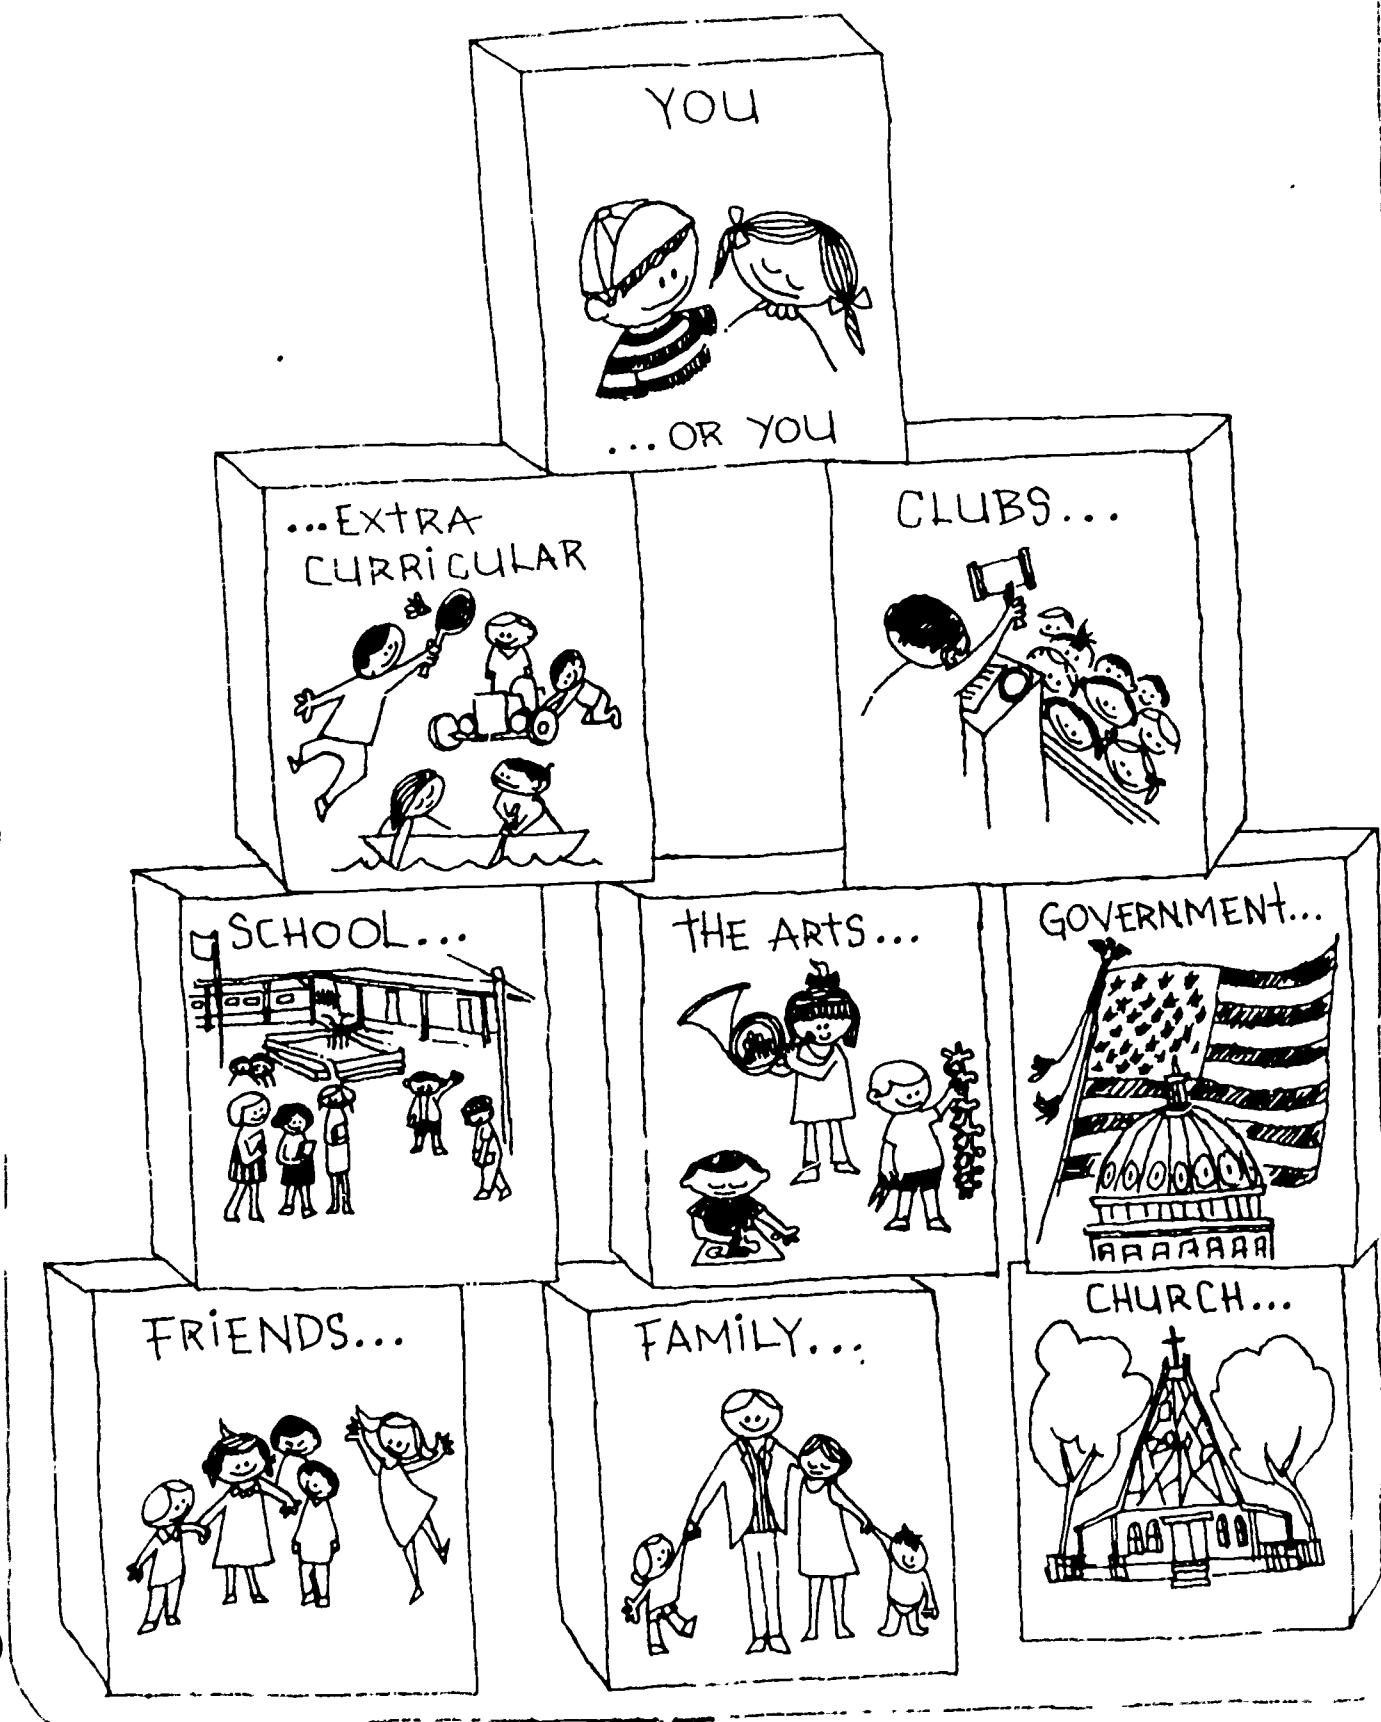

Since your personality influences everything you do, including your relationship with the people and the world about you, it is important to take a good look at this whole YOU. By beginning to know more about yourself you can learn how you feel about others and in turn learn how others feel about you. You can get a better idea of the things that really interest you, and what you are best fitted to do--in future years in school and perhaps in the occupation that you will choose.

Most of us are a little afraid of things we do not know about, and this causes us to hesitate in making decisions or taking action. The picture you have of yourself works in the same way. As you know yourself better you will be better able to make decisions and to set your goals. Why don't you get better acquainted with YOU!

## AUTOBIOGRAPHY

Divide the paper into the following three points: About Myself, About My School, and About My Home and Future. Please write the paper one part at a time. Use paragraph form, as you would in any theme. *Do Not* set off different parts of your paper with A, B, C, etc.

### I. About Myself

A. What kind of person I feel I am. The following traits are merely suggested and you need not feel obligated to use all or any of them to describe yourself. Use the dictionary to find their meanings. Don't simply go down the list saying "I am emotional," or "I am adaptable," etc. If you use words to describe yourself, it is always best to give reasons or examples to strengthen the statement you make. In any paper try to give examples or reasons to back up your statements.

WHAT HAVE YOU GOT TO OFFER?

23

What kind of an employee will you make? The following are some questions you can ask yourselves in taking stock of what you have to offer.

1. Do you have a real willingness and desire to learn new skills and new ways of doing things?
2. Are you neat in your personal appearance and work habits?
3. Are you punctual?
4. Can you apply yourself to a job without being easily bored or distracted?
5. Can you adapt to new and unexpected situations easily?
6. Can you work under pressure, when necessary, without becoming nervous and upset?
7. Do you have confidence in your abilities?
8. Are you emotionally stable, capable of taking things in your stride?
9. Have you enough initiative to be able to work on your own?
10. Are your job plans in keeping with your own capacities and the opportunities employers have to offer?
11. Do you have a sense of duty and responsibility?
12. Are you reliable? Can you be depended upon to do a job satisfactorily?
13. Can you gain the friendship and respect of fellow workers?
14. Can you cooperate with fellow workers?
15. Can you cooperate with supervision and management?
16. Can you follow directions willingly and without argument because you respect authority?
17. Can you understand instructions and carry them out accurately?
18. Can you accept criticism without feeling hurt?
19. Can you work without constant supervision?
20. Do you ask questions about things you don't understand?
21. Can you complete a job once you start it?
22. Are you a pleasant person to work with?
23. Do you like people?
24. Are you friendly and congenial?

In what ways do our emotions affect us?</li><li>3. What useful purposes can our emotions serve?</li></ol>

We have just seen how the conflict between your basic drives and what is expected of you has affected your personality growth. Now we're going to discuss another important factor.

Everyone needs security, recognition, love and affection, and new experiences. These are called emotional needs. How these needs of yours were met from the day you were born has helped shape your personality.

#### I. YOU NEED TO FEEL SECURE

Feelings start early. Even before you were born you felt. The feelings were good ones: warmth, comfort, complete security.

At birth, everything changed. You came into a new and threatening world. There were noises, lights, changes in temperature. As if this weren't enough, you had strange new feelings inside yourself. You were hungry. You had to breathe.

In the beginning, your feelings of physical discomfort were easily satisfied. If you were fed when you were hungry, kept warm when you were cold, and given room to kick, you were happy.

The sudden change from complete comfort and security to an alarming world probably frightened you. You wanted to be reassured that all was well. If you weren't reassured, you became tense or had new feelings of anger and defeat.

Your personality was beginning to take shape. If your parents were wise and understanding, they answered these earliest demands by giving you food, comfort, and plenty of "mothering." Then you felt secure and adequate.

You liked your new world and began to develop an enthusiasm for living and for trying new things. You trusted people and situations. You felt you were loved because you were you. So you developed feelings of self-confidence and you became friendly and cooperative. You accepted minor disappointments and frustrations (situations in which you couldn't reach your goal or have what you wanted) because your experience had already taught you that you could trust the world you lived in. As you grew older, you didn't feel you had to fight against reasonable rules and regulations.

All babies, however, are not this fortunate. With the best motives in the world, many parents fail to see that their baby's needs are met. They fight against their own natural instincts to cuddle and protect their children. Or perhaps they are told that too much cuddling is somehow wrong. Some years ago, for instance, parents were told that babies need quiet and rest. Mothers were warned that picking up the baby "spoiled" him. They were told that babies thrive best under a rigid routine (and identical routine for all these little individual babies!) and that they

should be fed "by the clock".

29

We now know that withholding demonstrations of love or imposing strict discipline too early in life is wrong. It harms a baby's growing personality. Controls must come gradually, when the baby is ready for them. He must first feel perfectly secure in his own world before he is able to learn self-control.

When a baby's emotional needs are not satisfactorily met, he is likely to develop one of two ways of behaving. This way of behaving becomes a habit which is hard to change later in life:

1. Retreat. One way of behaving is to retreat. In other words, the child becomes timid and shy, lacks initiative and self-reliance. He seldom gets the credit he should for his abilities because he doesn't express himself.

2. Attack. Another way of behaving is to attack. The child tries to punish the people who withhold love and comfort by fighting back. He resists any kind of discipline, rebels against any rules. As he grows older, he takes out his hostile feelings by trying to punish anyone in authority.

## II. YOU NEED TO BE APPRECIATED

Just as you need to feel secure, you also need recognition, appreciation and approval for what you are and what you do.

The little three-year-old who proudly presents to his mother a sheet of paper full of scribbles, calling it "my letter to Aunt Mae," wants praise and approval for his efforts. If your efforts or abilities in such little ways were scoffed at or ignored as a child, you may never have gained the healthy respect for yourself that all of us need.

People who learn early that their efforts are useful and valuable find it easier later on to do worthwhile things.

Throughout life you will be trying to gain recognition. One of the difficulties in our highly complex civilization is that recognition so often comes only from achievement in material ways. And people sometimes set their goals for material success too high. Repeated failure to meet these goals brings on anxiety and discouragement.

It is better always to strengthen the talents and capabilities you have and accept the fact that there are things you can't do successfully. Concentrating on successes, not on failures, will help you to be more successful. This will bring you the recognition you need.

How do you think these people are meeting their need for recognition?

### 1. PETE

Pete finds schoolwork difficult and boring. In class he's a showoff. He'd rather be scolded than ignored. Some of the girls laugh at his antics. He goes from one scrape to another.

How is Pete asking for recognition?

30

---

---

Can you suggest a type of childhood training that may have caused Pete's behavior?

---

---

Suggest more acceptable ways to which Pete can satisfy his need for recognition.

---

---

2. HARRIET

Harriet worked hard on her solo part and helped the band win first place in the state contest. The whole school was proud of her and she got a great deal of satisfaction out of doing a good job.

How did Harriet's ways of achieving recognition differ from Pete's?

---

---

Suggest how childhood training may have influenced her behavior?

---

---

III. YOU NEED LOVE AND AFFECTION

Closely bound up with your need for feeling safe and secure is your need for love and affection.

If, in your infancy, your family expressed their love for you, you learned you were wanted and loved. Knowing this helps you even now to take the ups and downs that are a part of everyone's life.

This need for love is also closely bound up with the need to love others, which we'll talk more about later. Loving and being loved bring out the best in you. Marriage, family, movements for improving social conditions, religion, and all the great humanitarian causes are associated with love.

Without love, human beings undoubtedly would be cold, indifferent, machine-like creatures without feelings of sympathy, understanding, or pity.

#### IV. YOU NEED NEW EXPERIENCES

31

Part of human nature is the need for new experiences. A young child is not satisfied for very long with his play pen. He wants to explore the room, to feel the texture of the rug, to discover what happens when he tugs at the lamp cord, to taste whatever he can pop into his mouth.

When you are little you need plenty of opportunities to touch, taste, feel, hear and see an ever-enlarging world to satisfy your need for new experiences. When children are kept too confined, their personality growth is stunted. They never learn to find ways to get more enjoyment out of everyday living or to find new and creative interests. On the other hand, some children whose needs for new experiences have never been satisfied go to the other extreme. They seek conspicuous, odd ways to satisfy their need. They try everything, whether it's good or bad.

These examples illustrate different ways in which people try to satisfy their need for new experiences:

1. SUE

Sue took the earliest opportunity to meet the new family next door. She had heard they had a girl about her age and that she had lived in England most of her life. Sue was eager to learn about school and dating customs in England. Do you think Sue is satisfying her need for new experiences in a healthy way? \_\_\_\_\_. Would you say that Sue's parents probably gave her a reasonable amount of freedom as a young child? \_\_\_\_\_

2. PERRY

Perry got no thrills out of the things most children enjoyed because his parents always gave him everything often before he even wanted them. Finally, for excitement, he joined a gang that skipped school and roamed the streets. Eventually he was brought into court for driving a stolen car. Why did Perry feel this need for new thrills?

---

---

Explain why it is a mistake for parents always to anticipate a child's wants and give him more than he needs?

CAREER DEVELOPMENT ACTIVITIES

**BROAD OBJECTIVE:** To make provisions for students to become better acquainted with selected careers in the theater.

**SPECIFIC BEHAVIORAL OBJECTIVE:** To show the student the roles of the scene designer and the scene builder in the theater.

ACTIVITY	SUGGESTED TECHNIQUE	RESOURCE MATERIALS
Read Play	The students should read the play to be produced and thoroughly discuss it.	<u>Stage Scenery and Lighting</u> , Seldon and Sellman
Design set	Student will design a set for one of the scenes in the play. This assignment can include a perspective sketch, a floor plan, a cardboard model, and working drawings.	<u>The Stage and the School</u> , Webster
Use set in play		

CAREER DEVELOPMENT ACTIVITIES

**BROAD OBJECTIVE:** To have the students realize the importance of attitudes, personal satisfaction, dignity of work, cooperation with co-workers, and dependability in work.

**SPECIFIC BEHAVIORAL OBJECTIVE:** Each student will be able to show in writing the importance of attitudes, personal satisfactions, the dignity of work, cooperation with co-workers, and dependability in work.

ACTIVITY	SUGGESTED TECHNIQUE	RESOURCE MATERIALS
Through composition the student will gain an understanding of attitudes, personal satisfaction, dignity of work, cooperation with co-workers, and dependability in work.	After studying the paragraph on how to incorporate paragraphs into a composition, give an assignment to write a composition using the students newly gained knowledge of composition in one of the following topics: 1. Attitudes toward work determine success or failure. 2. Your occupation will give you personal satisfaction. 3. Dignity of work. 4. The importance of cooperation with fellow workers and employers. 5. Be dependable in your job. Write the preceding topics on the board and discuss each topic. After discussion have students choose one topic for a composition. <u>ACTIVITY</u>	<u>SUGGESTED TECHNIQUE</u>	<u>RESOURCE MATERIALS</u>
Gaining insight into the world of work through writing a short story.	After reading and studying the short story and its writing essentials, have the students write a short story using one of the following topics as the theme of the story:  1. A newly married female realizes her husband's occupation as a school custodian has dignity. 2. A man never realizes that his poor attitude toward his work causes his repeated failure. 3. A woman discovers a great personal satisfaction through her work. 4. A man fails because he is not dependable in his personal life and at work. 5. A young college man realizes that he has been dishonest with himself in his self-evaluation.	English Grammar text SRA Guidance Series

### CRITICAL THINKING

Critical thinking is the ability to solve problems by using logical methods. The ability helps a person to adjust to new situations in his daily living and can aid him in making wise occupational choices in later years.

Process of critical thinking:

The steps might be listed as follows:

1. Identifying and defining the central issues. State your problem clearly.
2. List the obstacles that stand in the way of your solving this problem.
3. List the assets in your favor that you have to work with in solving this problem.
4. List possible solutions. (Put them all down, even if some of them don't seem logical at the moment.)
5. Try to figure out what the results of each of these solutions would be.
6. Choose the solutions that seem best to you and put them into action.

### PROBLEM IDEAS

Possible Problems:

School Related  
future  
About Myself  
feelings  
getting along with others  
home and parents  
boy and girl friendships  
health

Things in General  
war  
poverty

### Difficulties

from problems within ourselves  
physical or mental deficiencies  
personality problems that hold us back  
habits of behavior

When we aren't getting anywhere with solving problems it is time to seek help.

Some tips to follow in deciding if you need or want help:

1. If you feel troubled and can't put your finger on the problem.
2. If you try to escape the problem.
3. If you get terribly angry and upset about your problem.
4. If when you list things that stand in your way you find you are always blaming others.
5. If you can't figure out anything in your favor that will help you solve your problems.
6. If your solutions are unrealistic, or even imaginary.
7. If you are continually dissatisfied with the solutions you decide upon.
8. If you take an unusually long time in solving your problem.

Where to get help:

your family  
counselor  
teacher  
minister  
a sympathetic adult  
professional  
family doctor  
psychiatrist  
clinical psychologist  
psychiatric social worker

## HOW PERSONALITY GROWS

When you think about your personality, you probably think about the person you are today. But how did you get that way? To answer that question we really have to understand how personality grows and the things that affect that growth.

Picture yourself as a new-born infant. You wanted what you wanted when you wanted it. And you let the world know. Of course, you didn't always get it immediately. It took time for your bottle to warm up or for other to get to you. In having to wait, you faced the first conflict between what you wanted and what you could get.

As a little child, you cried or fought to get your way. You felt rebellious when you didn't get what you wanted. You didn't reason, you didn't consider others, you were only concerned with your own wishes, your own basic drives.

We are all born with basic, biological drives. They are an essential part of our equipment for living. Psychologists have listed and classified many of them. Here are a few:

1. Aggression or the drive to survive
2. The sex drive
3. The hunger and thirst drive
4. The drive for physical activity
5. The drive for growth (which includes mental, emotional, spiritual, and physical growth)

These drives have to be satisfied. Even as a baby you instinctively felt this. The thing you didn't know was that your need to satisfy those drives often conflicted with the needs of others. When you were hungry in the night, you wakened and cried with no concern for your tired mother. You hadn't yet learned to think of anyone else's welfare. You didn't know that the world into which you were born was soon going to expect you to consider others and to be co-operative, honest, and loyal. But slowly your parents

and others around you taught you these social standards. They taught you that you had to control and direct your desires and that you had to learn the difference between right and wrong.

Of course, the battle within you continued. There were many struggles between what you wanted to do and what you were allowed to do. Learning the habits and conduct that others expected of you wasn't easy. You probably wondered often why you had to share your toys and eat what was good for you. And you probably refused quite often to follow some of the rules set down for you by parents and teachers.

## LEARNING SELF-DISCIPLINE

If you were fortunate, your parents helped you slowly gain control over your desires and drives. You learned to give up some kinds of behavior in order to get that smile of approval from Mom and Dad. And through your learning experience you slowly developed your own conscience - a kind of inner policeman that tells you what is right and what is wrong. For instance, when you were very small the only way your mother could keep you out of the candy box was to keep it out of sight or punish you. As you grew older and learned that you couldn't take a piece of candy anytime you wanted it, you depended on your own conscience, not your mother, to keep you from eating the whole box of candy. You were learning self-discipline.

At the same time you were also learning to "sublimate." According to the dictionary that means to redirect your urges from activities society doesn't approve of into activities that are more desirable. Sports of all kinds for example, give you a chance to "redirect" your aggressive urges. When you feel irritated with the world, instead of getting angry with a friend, you can try beating him on the tennis court. Sex drives that society requires

you to control and sublimate can lead to creative activities like art and music.

### KEEPING THIS BALANCE

All parents are eager for their children to be "good" boys and girls. But sometimes they are too eager. They issue too many "don'ts" too early and are too hard and too strict. The child never has a chance to learn self-control or to make his own choices. The control all comes from his parents.

Some parents bend too far the other way. In their eagerness to give their child love, they neglect the discipline that a child needs if he is to learn what is expected of him.

Discipline is a necessary part of living, but it must be learned gradually or the two forces of what you want to do and what others expect of you will get out of balance.

Then, either of two things may happen:

1. If your drives are too strong and uncontrolled, your behavior becomes undesirable. Your wishes probably clash with those of other people, but you always do as you please, ignoring the other fellow.

2. If your conscience (that's your inner control) is too strict, you become too hard on yourself. You worry over every fault and failure. You feel guilty about everything you do that isn't exactly right. You may be unable to live comfortably in your social world. You may withdraw from people and become unable to express yourself. You may also seek relief through continual tiredness or illness-headaches, upset stomach, or other ills. Balance between the two forces is what you want.

Few of us ever completely outgrow this struggle between the two forces of what we want to do and what is expected of us. You are probably still facing it. You may still refuse to follow certain rules that adults expect you to follow. But, for the

part, you have probably learned to want to do what others expect of you. And, in growing up, you have copied the behavior of your parents or other adults you like and trust.

When you have learned to keep a good balance between your desires and what society expects of you, you have truly grown up. The mature well-adjusted person is the one who thinks of other people's happiness and comfort, even though he may have to give up some of the things he wants to do.

In the space provided, indicate whether you think it's the kind of training that will help the child balance what he wants to do with what people expect of him. Explain your reasons.

1. Mrs Smith told Mrs. Jones: "I know Timmy's destructive when he scribbles on the living-room wall, but he's so little I just hate to say 'no' to him. He'll have it hard enough later on."

---

---

2. Jack said to his father: "I'm so mad at Jim I'm going to sock him next time I see him." Jack's father replied: "You're getting to be a big boy now. There are other ways of settling a quarrel besides socking. Can't you talk the matter over with him? If you have so much energy, why don't you try to wear some of it off on your new punching bag?"

---

---

3. "Good little girls are seen and not heard." Jane couldn't remember how many times her mother said that to her. When Jane was in high school, she was very quiet and took no part in school activities.

CAREER-RELATED ACTIVITIES

BROAD OBJECTIVE: To enable students to complete an activity by correctly following oral or written instructions or directions.

SPECIFIC BEHAVIORAL OBJECTIVE: To make students aware of importance of following directions, oral and written.

SUGGESTED SUBJECT AREA English  
SUGGESTED GRADE LEVEL Jr. - Sr. high

ACTIVITY	SUGGESTED TECHNIQUE	PRESOURCE MATERIALS
Students will perform various actions according to directions created by another student.	1. Have one student give directions for performing some simple action. Have another student follow them. Example: brushing teeth or an exercise.  Define: Directions Instructions Following directions Oral directions Hearing Listening Looking Concentrating	Following Directions (attached)  Discuss importance of following directions.

FOLLOWING DIRECTIONS

92

1. Read everything before doing anything.
2. Put your name in the upper right-hand corner of your paper.
3. Circle the word "corner" in sentence two.
4. Draw five circles in the upper left-hand corner of your paper.
5. Draw a square around each circle.
6. Put an "X" in each circle.
7. Write your name under the word "Pre-test."
8. Next to the word "Pre-test" write "Yes. Yes. Yes."
9. Put a circle around each word in sentence 6.
10. Draw a triangle in the lower left-hand corner of your paper.
11. On the back of your paper multiply  $5 \times 20$ .
12. Underline the word "paper" in sentence 4.
13. Call out your name when you reach this point in the test.
14. If you think you have followed the directions up to this point, call out, "I did!"
15. On the back of your paper add  $90 + 7$ .
16. Draw a circle around the answer to number 15.
17. Put a square around the circle in question number 15.
18. Count out loud in your normal speaking voice from one to ten.
19. Subtract 6 from 10.
20. Now that you have finished reading carefully, do only sentences number 1 and 2.

CASE STUDY: ELEMENT ACTIVITIES

BROAD OBJECTIVE: To learn reasons for safety rules on the job.

SPECIFIC BEHAVIORAL OBJECTIVE: To enable students to understand and dramatize vocational safety rules and to discuss the reasons for these safety rules.

SUGGESTED SUBJECT AREA English  
SUGGESTED GRADE LEVEL Jr. - Sr. High

ACTIVITY	SUGGESTED TECHNIQUE	RESOURCE MATERIALS
The students will perform charades by selecting a safety rule and acting it out. Have class guess the rule and then discuss orally the reasons for this rule.	Discuss various types of vocations and list rules of safety which should be employed.  Sample rules and charade suggestions are on the following page.	A physician could discuss cases in which safety rules were not followed. A fireman probably could also.

## SAFETY RULES AND CHARADES

1. WEAR SHOP CLOTHING APPROPRIATE TO THE INSTRUCTIONAL ACTIVITY BEING PERFORMED.

You are wearing low quarter shoes instead of boots while welding. A spark drops into your shoe.

2. CONFINE LONG HAIR BEFORE OPERATING ROTATING EQUIPMENT.

You have shoulder length hair. You are operating some sort of rotating equipment. You have forgotten to tie your hair back and it gets caught in the machine.

3. ALWAYS WEAR SAFETY GLASSES. USE SUITABLE HELMETS AND GOGGLES FOR WELDING.

You have just one more weld to make. You decide not to put your goggles on. A spark flies into your eye.

4. REMOVE TIES WHEN WORKING AROUND MACHINE TOOLS OR ROTATING EQUIPMENT.

You have stuffed your tie inside your shirt front instead of removing it. You are running a sabre saw. Your tie works out and gets caught in the saw.

5. REMOVE RINGS AND OTHER JEWELRY WHEN WORKING IN THE SHOP.

You forgot to remove your ring in the shop. You get it hung on a nail head sticking out of a board you are picking up. You try to drop the board. It twists and tears the flesh from your finger.

6. CONDUCT YOURSELF IN A MANNER CONDUCIVE TO SAFE SHOP PRACTICES.

(Choose a classmate to help you in this charade.) You just can't resist picking up a scrap of wood and throwing it at one of your friends because you know he will duck. He doesn't.

7. USE SOAP AND WATER FREQUENTLY AS A METHOD OF PREVENTING SKIN DISEASES.

You have been using acid in soldering. You are in a hurry and do not wash your hands. All at once you discover your skin is badly irritated.

8. KEEP ALL HARD TOOLS SHARP, CLEAN, AND IN SAFE WORKING ORDER.

You are working on a lawn mower with a greasy wrench. Because of the grease the wrench slips off the nut and hits you in the head.

**BROAD OBJECTIVE:** To make students aware that skillful listening is necessary for clear expression, creative human relationships and productive group work.

**SPECIFIC BEHAVIORAL OBJECTIVE:** The students will list the three aspects of listening: content (facts & figures), feeling (how what the speaker is talking about affects him), and for process (what the speaker is trying to accomplish by what he says).

## LISTENING

99

Is listening important?

As adults we use language in this order.

- a. Listening
- b. Speaking
- c. Reading
- d. Writing

Language is either oral or written.

"We can read faster than we can listen."

"We think at about the same rate we read."

"Listening is done at a slower rate and because of this, the two must be brought into focus."

How is information related to what is already known?

We fill in the time between listening and thinking with any related information.

There is a difference between listening and hearing. Every seventh second, the auditory nerve is inoperative and realigning because it cannot take the constant bombardment of sound.

Reading and listening is related to:

- 1. the act of seeing
- 2. perception is the mean unit of language
- 3. comprehension is related to the known
- 4. taking what we know and using it is utilization.

### Twenty Principles of Listening

To listen effectively is an art. Listening well requires conscious attention to these things:

Awareness: The mind can direct itself to only one detail at any one time. Therefore, we cannot talk and listen simultaneously. We must concentrate both visual and mental attention to the other person.

Focus: Keep the mind receptive to what is being said. Try to grasp the speakers meaning and feeling. Avoid any negative aspects of the other person.

Summary: Ask-what has been said? What does this mean? Pause before responding. Think, then answer. If interrupted, stop and refocus on listening!

Read paragraph orally and have them listen for:

1. main ideas
2. details or facts

Write notes at end.

Have students submit questions that can be asked of the class after his oral report is given.

Word of the Month Club:

Choose a word that is of interest to you (student)

Present an oral explanation and definition.

Write on the board.

Present a short test when finished.

Inventory:

What did we learn?

Summary

This is good for class end.

Games:

Numbers

In grandmother's trunk is:

I went to the store and got a pound of butter. I went to the store and got a pound of butter and a quart of milk. Continue this.

What's in a word:

give definition

then first word

then number of letters

Twenty Questions:

YES or NO answers only

Listen to recordings and listen for examples of illiteracy

To emphasize listening loss:

Have three or more students leave the room.

Read a short article to the remaining students. (Be sure the article has more facts than they can remember to emphasize listening loss.)

Have member of large group tell one of the three the story they heard.

Then that person will tell the second of the three.

Then the third will retell the story to the class.

This illustrates that we add things not heard. We say things that are wrong (twist facts).

We leave out important information.

There were primary and secondary sources of information

Discussion questions:

Why were or are certain facts remembered?

Why is there listening loss?

1. We try to remember too many facts.
2. We discard seemingly minor details.
3. We listen and hear only what we want to hear.
4. We don't hear.
5. Poor acoustics.
6. Words not understood.

## HOW NOT TO TEACH LISTENING

Oral reading of stories in a class. This is okay for poetry.

Repetition of answers given to oral question.

Encourage that answers to questions be directed to members of the class. Kids become poor speakers because they give answers to teachers rather than to class.

Students become sloppy because the teacher repeats. Instead, have students repeat so the class members can hear.

Oral reports need to be followed up with questions from listeners. This also encourages more meaningful questions.

Ways to teach listening more effectively:

1. Prepare
2. Set up purpose; there must be a purpose for listening.
3. Present meaningfully.
4. Followup.

## Twenty Principles

- Most people listen but few hear
- Inability—or unwillingness—to listen is the major cause of poor communications
- Poor listening means poor concentration. Which means a large ego
- A major index of emotional maturity is the ability to listen
- Pretend you have no voice. Not only will you interrupt less, you will hear far better.
- Observe the good listener. even his physical posture shows concentration
- If it's worth saying, it's worth listening
- Notice how often a poor memory goes with a poor listener.
- Speak with enthusiasm but listen with calmness.
- A top professional at anything is a master listener.
- For one full day, speak as little as possible.
- If you must speak, ask questions.
- An interruptor is usually guarding a closed mind.
- Poor listeners, shuffle papers, look away, change the subject
- Good listeners stop the phone, look you in the eye, give you all the time you need
- A great control for social or business tension is the practice of the art of listening
- Disastrous decisions have been made by key people because they "tuned in" on the other person's appearance or personality instead of on what that person was really saying.
- To listen with art, practice a listening attitude, a listening posture, and concentration
- There is no such thing as an unpopular listener
- To succeed, one must understand. To understand, one must hear. To hear, one must listen!

INTERVIEW QUESTIONSHealth

Are you in good physical condition?  
 Do you have any problems that will keep  
     you from doing certain kinds of jobs?  
 Are you frequently ill?  
 Will you take a physical examination?

Financial

Do you contribute to your family financially?  
 Do you have personal debts? Pay bills?  
 How much do you expect to earn?

Future Plans

What do you want to be ten years from now?  
 Are you planning any future training?  
 Are you willing to take part in our  
     training program?

SILENT QUESTIONS

Is he in good health?  
 Is he physically able to do the job?  
 Is there any indication of emotional problems?  
 Will he be frequently absent?  
 Does he have physical handicaps?

Does he have a mature attitude about  
     finances?  
 Will he be likely to have financial difficulties? attachments?  
 Is he realistic in terms of expected salary?  
     benefits?

Is he willing and able to profit by future  
     training?  
 Does he have realistic vocational goals?  
     Is he pursuing them?

During the interview, let the interviewer lead the way. Have the information about yourself well in mind so that you can answer his questions accurately and forthrightly.

Near the end of the interview is the best time to ask about salary, benefits, union, and required tools and clothing. To do so earlier creates the impression that your main interest is in money and not in the job itself.

The interviewer will give you a hint when he desires to end the interview. Don't prolong things after that point. It is in order to ask about future openings. Be sure to thank the interviewer for his time.

## CAREER DEVELOPMENT ACTIVITIES

**BROAD OBJECTIVE:** To acquaint students with types of employment tests and to become aware of skills needed by prospective employees.

**SPECIFIC BEHAVIORAL OBJECTIVE:** After completing the activity at least 80% of the students should be able to list three of the many skills that employment tests are testing and relate the importance of these three skills to most occupations.

ACTIVITY	SUGGESTED TECHNIQUE	RESOURCE MATERIALS
Pre-test Students complete the sample employment tests and discuss the skills needed to complete the answers correctly.	1. Students take employment tests. 2. Discuss the questions item by item to discover what skill the question is testing. Post-test	3. A. Discuss why these skills would be necessary for employment. B. Using the chart, as found in Schools, Subjects, and Jobs look at skills necessary for a particular kind of employment.	Pre-test 1. Name three skills tested in employment tests. 2. Tell why each of these skills is important to most occupations. Post-Test 1. Name three skills tested in employment tests. 2. Tell why each of these skills is important to most occupations. 3. Recalling the chart, name one of the jobs you found interesting and list three of the skills that were said to be important to that job.

BROAD OBJECTIVE: To acquaint students with what will be expected in first weeks on a new job.

SPECIFIC BEHAVIORAL OBJECTIVE: The students should be able to show by example of their own behavior, the lessons the role-playing emphasized. ons SUGGESTED GRADE LEVEL. Jr. - Sr. High.

## POINTS TO CONSIDER TO ASSURE JOB SUCCESS

During the first weeks you must adapt yourself to your employer and co-workers. They in turn are adjusting to you.

The highest rate of personnel turnover occurs in the first few weeks on a job, so the first impressions are especially important.

The following tips can help you succeed at your job!

\*Dress appropriately. Find out the kind of clothing you are expected to wear.

\*Your manner. (How you conduct yourself in the presence of your co-workers.) An office or plant is part of the adult world and childish behavior is out of place, disturbing, and unwelcome.

Your first task is to learn your new job. Learn it as rapidly and as thoroughly as possible.

\*Ask questions if you are in doubt about what is expected of you.

Show initiative and interest and appreciation for the help you receive.

Get as much information about your job as you can by using libraries, trade publications, your company magazine.

Learn to know your employer's company and how your work ties in with the total picture.

Cultivate good habits:

Be on time.

Be pleasant to be around.

\*Be systematic in your work.

Be at work.

\*Be accurate and neat.

Be conscientious.

\*Follow rules and regulations.

\*Work well with others:

How well you get along with your co-workers can mean the difference between satisfaction and dissatisfaction with your job.

\*Don't expect the group to adjust to you. They got along fine before you arrived, and it's up to you to win their friendship and respect.

Getting along with the boss.

Your performance and progress on the job depend on how he sees you.

Your good habits will impress him.

The conscientiousness and punctuality will impress him.

\*Show him respect but avoid false humility and apple polishing.

Try to see his side and understand his position.

\*Learn to be a good listener.

Look for ways of improving your job, but don't be too quick to suggest changes. Make your suggestions diplomatically.

If you wish to progress you must be prepared to do your job better than anyone else, by developing greater skill and understanding.

## STEPS IN ROLE-PLAYING

117

### Preparation and Selection:

1. Select the problem
2. Discuss aspects of performance and expression.
3. Explain exact role each actor will play.
4. Explain role the audience is to play.

### Audience Roles:

1. Should be looking for specific points.
2. Suggest that each of them identify with or try to experience the feelings of one or another of the actors.
3. Assign some other task that makes them responsible for observing some aspect of the action and reporting on it.
  - a. General interaction
  - b. Identify feeling, thoughts and actions of one or another of the major role participants.

### Dramatic Action and Discussion :

1. Enough time must be allowed for the student to become thoroughly immersed in role.
2. At conclusion it is important to dissociate the actors from the role they played.
3. Students must concentrate on role played and not on actions of the persons portraying actors.

### Evaluation:

The teacher and students should review the successes and failures of their role-playing experience. The purposes, procedures and effects of role-playing should be analyzed so decisions about the need for additional role-playing or reenactment of the scene can be made.

## APPENDIX: RESOURCE MATERIALS FOR ROLE PLAYING

Many types of role-playing exercises are included in this Appendix.\* Some are most appropriate for elementary school students, others are designed for intermediate or secondary school students. Many areas of interpersonal, intergroup, community, and academic experience are presented in these examples. They are only examples, however, and the teacher should select those best suited to the needs and abilities of his class, rephrase or modify them, or create new ones as he sees fit.

### *I. Warm-up Exercises*

A. These exercises are basically pantomimic and require a minimum of emotional involvement and expression. They may be effective for freeing inexperienced or withdrawn students to perform in front of their peers. Where multiple endings are given, the teacher can select only those he prefers or give them in succession to one or to different students.

1. Pretend that you are walking -- through very deep snow --on marbles. --through fallen leaves
2. Pretend to eat --an ice-cream cone --a potato chip --a lollipop --a pickle --a toasted marshmallow --cotton candy --a lemon.
3. With another student or in a circle of students, pretend to toss back and forth --a baseball. --a basketball. --a chunk of ice. --a feather. --a porcupine --a pillow --a very hot potato
4. Show the class what you would do if: --you had just walked five miles. --the temperature got up to 95 in the shade --you tried to lift some barbells. --you had a blister on your heel but were late for school --you had a cinder in your eye. --you had to carry a full pail of water without spilling any.
5. Without using any objects, show the class how you. --brush your teeth in the morning. --nail two boards together. --put on a pullover sweater
6. Stand facing another student. When he makes a movement, pretend that you are his reflection in a mirror. Keep this up until you can do it well, then change roles. Make your moves slowly at first, don't try to trick the other person.
7. Read aloud from one of your schoolbooks, pretending that you have a mouthful: --of marbles. --of straight pins --of peanut butter

1. Name four of the nine requirements management expects possible employees to meet.
2. Name four of the nine skills that employers feel most job applicants are deficient in.
3. In regard to the skills named, what can a student do to begin acquiring each of these skills?

"I'm sorry, Miss Jones, but we just don't have any opening for you."

You are probably still a little young to have heard this sentence or one like it directed to you, but some day in the future you may very well experience the feeling of having not been accepted for a job. The reasons why people are not hired are long and varied, but, in general, employers have some basic ideas as to what they don't want and what they want in an employee. A group of employers in California gave the following as reasons for not hiring job applicants:

1. Educational requirements could not be met. Most employers require a high school diploma as basic qualification, higher degrees of skill or training for specific types of jobs, i.e. shorthand for certain types of secretarial jobs.
2. Failure to meet minimum company test requirements. Most companies use some form or other of objective test, either single test or a battery.
3. Lack of skill or experience in jobs available.
4. Personal qualifications, i.e., attitude, appearance, personality, verbal expression.
5. Physical and/or medical reasons.
6. Poor references.
7. Security reasons.
8. Unsatisfactory scholastic and/or attendance record in school.

You can get a good idea of what employers want by studying the application forms and the interview forms they use. We will look at one or two of the forms shortly; however, first we shall look at some of the major requirements for a person wanting his first job in a company. Requirements seem to be:

1. Acceptable attendance record both at work and school.
2. Acceptable behavior record.
3. Acceptable past employment record.
4. Career interests.
5. Eighteen years of age.
6. High school diploma or equivalent.
7. Minimum scores on tests.
8. Personal qualifications; physical requirements.
9. Requisite skills for specific jobs.

Employers want the best employee they can get. The companies to which you will go in search of your first job tell you that there are certain things you can do that will improve your chances of being hired. Following is a list of the important preparations employers think you need:

1. People applying for secretarial or clerical work need a better understanding of grammar, spelling, simple mathematics, typing and shorthand.

2. There needs to be a better understanding of arithmetic, grammar, and spelling for everyone.
3. Students should learn how to act in a business office, how to dress, and that "good results" will be expected and required of them by their employers.
4. Students should learn how to apply for work, job interviews; should be aware of importance of personal hygiene, courtesy, and employer-employee relationship.
5. Students should be "directed toward a field or vocation which is reasonable in terms of their individual skills, aptitudes and abilities."
6. Students need to be aware of the outlook for employment in an area, the wages, and the nature of preparation that is required.
7. Students need to learn how to approach and solve problems.
8. Students need to learn how to work with others; how to get along with fellow employees and how to take instruction.
9. Students need particularly to learn about acceptable grooming and more appropriate ways to dress.

RESOURCE MATERIALS

Procedure

1. Name four apprenticeship opportunities in today's world of work.

2. Name two characteristics of apprentice situations and two qualifications required of an apprentice.
3. Write a short summary comparing apprenticeships now to those in our early history.

## WHAT IS AN APPRENTICE?

127

An apprentice is a worker who goes through a step-by-step learning program to become a journeyman, craftsman or mechanic in a recognized skilled trade which will take two or more years. The length of the training program depends upon a written agreement, although sometimes it is oral. In most skilled occupations the training program lasts from three to five years.

There is a Federal Committee on Apprentices that sets standards to assure that the apprentice will gain skills and proficiencies necessary to a craftsman. The committee requires that an apprentice be trained under a schedule of work experience on the job and in related instruction, and that he be regularly rated.

An apprentice is taught use, care, and safe handling of tools and equipment used in connection with work. Classroom work is required in subjects related to techniques of the trade. Many junior colleges offer courses for apprenticeship programs.

### Characteristics of the Job

Occupations with apprenticeship programs are usually highly regarded, not only because wages are high for journeymen, but because supervisors and managers often apprentice-train.

Apprentices usually receive half the hourly wage of the journeyman\* at the beginning of the training program with gradual raises until the end of the program.

If the apprentice needs handtools in the trade, he may get them on his own or funds may sometimes be advanced by the employer. In some cases the employer loans the apprentice the tools.

Most trades with apprenticeships are highly unionized.

The apprentices may be moved from one employer to another to help him gain a variety of experience in all branches of a trade.

### Qualifications

High school graduation or similar qualification is generally preferred. Even where it is not required, high school education, with emphasis on courses in mathematics, gives an apprenticeship candidate an advantage in nearly all programs. Vocational courses in high school are helpful. Basic arithmetic is required for most apprenticeships. Young men between the ages of 16 and 24 are preferred.

### Characteristics of applicants

The applicant must be accurate, patient, and able to follow complex instructions; must be resourceful; usually have manual and finger dexterity.

### Employment prospects

Opportunities for apprentices are limited in most fields but vary among trades and communities. Usually there are many more applicants than openings. Jobs are almost entirely for men. In one state, out of approximately six million persons in the industrial, technical, production labor force, there are only 23,000 persons in apprenticeship programs.

\*Journeyman - an experienced reliable workman in any field.

Advancement Opportunities

Wage and skill advancement, generally taking place at six-month intervals, are determined by agreement within industry. When the training period is finished, the apprentice receives a certificate of completion, and he assumes a journeyman status. His advancement may then be to foreman or other supervisory and sometimes managerial positions. In many occupations that have apprenticeship programs, the worker may sometimes set up his own business and be self-employed.

Where the Job is Found

The person seeking an apprenticeship should apply to the local office of the State Employment Service. He can also apply directly to the appropriate labor union, contractor, or employer associations, local joint-apprenticeship training committees, or directly to employers.

A list of apprenticeable occupations is available in the Bureau of Apprenticeship and Training publication, Apprenticeship Training - An Investment in Manpower. For information about apprenticeships available in broad occupational areas, see the U. S. Department of Labor pamphlet, Job Guide for Young Workers.

CAREER DEVELOPMENT ACTIVITIES

**BROAD OBJECTIVE:** To show students that reading good literature is a source of enjoyment and a means of enlarging our experience, extending our sympathies, and deepening our understanding which are necessary in the world of work.

**SPECIFIC BEHAVIORAL OBJECTIVE:** Students will understand that the paradox of imaginative literature is that, though it deals with imaginary events and imaginary people, it can communicate real truth delivered living and whole to our senses, emotions, imaginations and our minds.

<u>ACTIVITY</u>	<u>SUGGESTED TECHNIQUE</u>	<u>RESOURCE MATERIALS</u>
Each student will select one short story of his choice and tell in writing how the story gives insight into life.	After studying a short story unit, assign the students a project to select and read a short story of their choice and to write a paper telling how this short story is a means of enlarging their experiences, extending their sympathies, and deepening their understanding of people to make them more fully human.	Short stories

**BROAD OBJECTIVE:** To acquaint students with the needs filled by recreation and types of activities to fill these needs.

**SPECIFIC BEHAVIORAL OBJECTIVE:** After completion of this activity, all students should be able to correctly name three of the five needs filled by recreation and two of the seven classifications of recreation activities.

ACTIVITY	SUGGESTED TECHNIQUE	R "OURCE MATERIALS
Through discussions, listings and writings the students will become aware of needs filled by recreation and the types of activities to fill these needs.	<ol style="list-style-type: none"> <li>1. Occupational Clusters for English

DIAGRAMS FOR EXPLORING OCCUPATIONS  
RELATED TO SCHOOL SUBJECTS

The diagrams on the following pages are designed to assist students who are undecided about a specific occupation, but have interest in one of the main subject areas. Each occupation has been coded according to the Dictionary of Occupational Titles for easy reference. Students who desire to obtain additional information about a certain occupation can refer to the professional title by the Dictionary of Occupational Titles code number.

The Dictionary of Occupational Titles is a United States Department of Labor publication, and consists of five points:

- (1) The occupational title,
- (2) the industry designation or work activity with which the occupation is identified,
- (3) classification by code number,
- (4) alternate titles, and
- (5) a brief description of the duties of the occupation.

The D.O.T. is available from the Superintendent of Documents, U. S. Government Printing Office, Washington, D. C., 20402.

The above refers to the D.O.T. (Dictionary of Occupational Titles) 1965 Third Edition, Volumes I & II.

Suggestion: The diagrams can be used on bulletin boards or for class discussions. (We would be interested to know how your school uses this information, particularly if the methods are different from those listed above.)
